

ADVANCED IMAGING · BONE & METABOLIC HEALTH

Bone & Metabolic Health Scan

DEXA Scanner

Your hormones directly govern your bone strength and body composition. Our DEXA Scanner gives you — and your provider — precise, actionable data to guide your treatment and track your progress over time.

WHAT WE MEASURE

- **Bone Mineral Density**
Detect osteopenia or osteoporosis early, before fractures occur
- **Lean Muscle Mass**
Understand how your hormone therapy is preserving or building muscle
- **Body Fat & Visceral Fat**
Measure the fat around your organs — a key metabolic risk marker

THE EXPERIENCE

- **Quick & Comfortable**
Fully clothed, no injections, no enclosed spaces — done in minutes
- **Ultra-Low Radiation**
Far less than a standard chest X-ray — completely safe for routine use
- **Detailed Report**
Results reviewed with your provider to guide your personalized care plan

RECOMMENDED IF YOU ARE

- ✓ On hormone therapy
- ✓ In perimenopause or menopause
- ✓ Managing low testosterone
- ✓ Losing weight
- ✓ Over age 50
- ✓ On long-term corticosteroids

ONLY
\$135
PER SCAN

A complete picture of your bone density, muscle mass, and metabolic health — in under 20 minutes.
